## Page Formatting and Typeface

To accommodate the needs of those with weaker vision, we use LARGER PRINT throughout the book whenever practical. The text in this book was created using Garamond (size 16). A little bit of page resizing, however, may have happened along the actual book printing process.

## Exam topics covered in this book

According to the NCARB, the registration of architects is a means by which U.S. registration boards and Canadian provincial and territorial associations fulfill their mission to safeguard public health, safety, and welfare. The exam consists of seven divisions, and this product covers the CODES & REGULATIONS / MATERIALS & TECHNOLOGY sections of the Building Design & Construction Systems division. The contents deal with the impact of design decisions in the selection of systems, materials, and methods on building design and construction, with code compliance in mind.

The ExamFOCUS notes targets readers with real world experience in the construction industry. To succeed in the exam, you need to read as many reference books as possible. There is no single book that can cover everything!

The ARE exam is a comprehensive one which is far from being easy! There are both MC questions and Graphical questions. To succeed in the exam, you need to read as many reference books as possible. There is no single book that can cover everything! This ExamFOCUS book focuses on the more difficult topics that will likely make a difference in exam results. The book is NOT intended to guide you through every single official topic. You should therefore use this book together with other reference books for the best possible preparation outcome.

## Table of Contents (2014)

Intellectual Properties, Trademarks and Copyrights .....	1
Contents Update .....	2
Page Formatting and Typeface.....	2
Exam topics covered in this book.....	3

Table of Contents .....	3
Review questions .....	8
Planning and Code/Rules Compliance .....	20
Overview of planning .....	20
Legal authorities on planning and zoning.....	21
Quality of life.....	22
Overview of building and related codes .....	23
Local licensing and certification requirements.....	26
Certificate of Occupancy and concerns on disability .....	27
Life safety, accessibility and egress requirements.....	29
Occupancy classifications .....	29
Construction types .....	32
Type-specific construction characteristics .....	35
Egress and fire codes.....	36
Multiuse buildings and occupancy separation .....	36
The concept of travel distance.....	38
Common path of egress travel .....	39
Means of egress .....	39
Egress requirements .....	40
Aisles and balconies.....	41
Special considerations.....	42
Egress capacity .....	43
Stairways and other egress components .....	43
Walking surface and ramp.....	45
Doors, corridors and guards .....	45
Signs and illumination.....	46
Area of rescue assistance.....	47
Safety Management in Construction .....	48
Overview.....	48
The role of OSHA .....	48
Hazards control.....	49
Using PPE.....	50
Types of hazards .....	51
Assessing the risk of using hazardous material.....	52
MSDS.....	53
Safety and Health Programs .....	54

Strength and Loading .....	55
Principles of mechanics and forces.....	55
Stresses, strains and tensiles .....	57
Fatigue and deformation.....	59
Compressive, bearing, and shear properties .....	60
Creep.....	61
Vibration, motion and kinetic .....	61
Structural strength and stability.....	62
Loads, dead loads and live loads .....	63
Other types of load .....	64
Structural elements .....	64
Exterior walls .....	65
Seismic design overview .....	66
Seismic design categories and building configuration .....	67
Load effects.....	69
Wind loads .....	70
Other environment loads.....	72
Design strength and limit state.....	73
Load tests .....	73
Special structures.....	74
Soil, Fluid, Concrete and Masonry .....	76
Soil mechanics .....	76
Fluid dynamics .....	77
Properties of soil.....	78
Classification, investigation and reporting.....	80
Excavation and grading .....	82
Overview of concrete.....	85
The ACI standard.....	86
Weathering probability.....	87
Exposure categories.....	87
Concrete characteristics .....	89
Mixing, yield and curing.....	90
Tensile strength .....	91
Anchoring and reinforcement.....	91
Workability and durability.....	93
Influence of temperature.....	94

Shrinkage, creep and fatigue .....	95
Foundation, grade and slab .....	96
Cracking, scaling and displacement .....	98
Joints .....	99
Footings, foundations and settlement .....	99
Formwork .....	100
Overview of masonry .....	102
Masonry units and walls.....	103
Masonry testing .....	104
Mortar and grout .....	105
Structural Steel and Wood .....	106
Overview of steel.....	106
Joist .....	106
Connections .....	107
Documentation .....	108
Overview of wood .....	109
Standards and grade marks .....	110
Wood decay and protection .....	111
Protection against termite and other insects.....	112
Engineered wood products.....	114
Roofing .....	115
Overview of components.....	115
General requirements .....	116
Concern on loads .....	118
Types of roofing.....	118
Roof assembly classes .....	119
Roofing material .....	120
Underlayment and flashing.....	121
Glass and Glazing.....	124
Types of glass.....	124
Laminated glass .....	125
Strength of glass.....	125
Glazing.....	126
Safety glazing.....	127
Impact levels .....	128
Construction Safety .....	129

Hazop .....	129
Regulations .....	130
Defining exposure .....	131
TLV, STEL, Ceiling, SEN and IDHL .....	131
Carcinogenicity classification .....	132
Aerosols .....	133
Particle deposition and concentration .....	134
Gases and vapors.....	134
Factor of safety .....	136
Material classification.....	136
Vibration related injuries.....	138
Ergonomics .....	139
Slips, trips, and falls .....	142
Heat stress .....	146
Fire safety.....	148
Welding safety.....	152
Radiation .....	153
Toxicology.....	154
Noise.....	156
Asbestos.....	158
Respiratory protection .....	160
Ventilation .....	161
Confined Space .....	163
Electronic safety.....	166
Rigging.....	171
Pressure vessels .....	172
Lockout/tagout .....	173
Energy Efficiency.....	175
Standards.....	175
Measurement and verification.....	176
R values and U factors .....	176
Features .....	177
